
Work Experience

Global AutoDistribution Inc.

Mandaue City, Cebu, Philippines

NetSuite Developer

February 2025 – Present

- Handles NetSuite administration, SuiteFlow, SuiteBuilder, and overall system configuration.
- Builds and customizes NetSuite reports (Report Builder, Analytics).
- Develops online/custom forms, templates, SuiteScripts, ClientScripts, and Suitelets.
- Provides reporting solutions, and user workflow enhancements.

Key Projects / Systems Developed

- NetSuite Development & Automation
 - Developed Saved Searches, reports, and analytics dashboards
 - Created custom records with workflows (Cash Advance, Fuel Request, Inventory Accuracy, Parts Cannibalization)
 - Implemented SuiteScript validations for bin capacity and item receipt processes
 - Built custom HTML/PDF templates for picking and packing lists
 - Developed Suitelets for printing estimates and opportunities

SharePoint Developer

- Works with SharePoint Designer, Microsoft Power Apps with Microsoft Power Automate, and M365 tools to automate workflows and improve internal processes.
- Supports Microsoft Dynamics 365 and Office 365 administration.
- Designs and maintains SharePoint sites, libraries, and business process flows.

Key Projects / Systems Developed

- **Power Apps & Workflow Automation**
 - Built systems (Cash Advance, Liquidation, Fuel Request, Leave Application)
 - Automated approval workflows using Power Automate
 - Used Microsoft Lists as backend database

Full stack Developer

- Builds applications using .NET Framework, ASP.NET/MVC, C#, and SQL Server.
- Develops full-stack features using Next.js, and MySQL.
- Manages AWS EC2 deployments and performs database administration.

Key Projects / Systems Developed

- **Dealer Parts Inquiry System (Next.js, MySQL)**
 - Built a role-based inventory inquiry system for dealers and managers
 - Displays real-time parts availability per location
 - Implemented dealer-specific pricing visibility (Dealer Price & SRP)
 - Added reporting for tracking dealer inquiry activity

- **Retail Sales & Inventory Tracking System**

- Developed system for dealer sales entry and unit tracking via CS#
- Integrated NetSuite data using saved search + email + Google Drive pipeline
- Built dashboards (Top Sales Consultants, Dealer vs Target, Model Tracking)
- Implemented date filtering and dynamic reporting
- Developed file upload system for VSI and VDR with image optimization
- Generated clickable document links in exported Excel reports
- Built filtered reporting for distributor-side analysis

Business System Analyst

- Gather and analyze business requirements
- Document requirements (BRD, FSD, user stories)
- Analyze current systems and identify gaps
- Create process flows and system diagrams
- Translate business needs into technical specs
- Coordinate with developers and stakeholders
- Support system testing (QA/UAT)
- Validate data and generate reports
- Propose system improvements and solutions
- Assist in system implementation and deployment
- Monitor system performance and handle issues
- Provide user support and training

Key Projects / Systems Developed

- **Netsuite User Manual (Operations side)**

- Developed role-based NetSuite user manuals to standardize company operations
- Performed system analysis and requirements gathering for process improvements
- Proposed system enhancements and coordinated with management for approval
- Identified inefficiencies and recommended optimized workflows

Junior Cloud Engineer

- Created and configured AWS EC2 instances, managing them to ensure optimal performance for deployed systems.
- Managed SQL Server instances hosted on AWS EC2 for database solutions.

Junior Software Engineer

- Developed and maintained applications (POS System: POS, POS Printing & PDE Server) using C#, and MSSQL, contributing to the overall system architecture.
- Express Experienced with Dev Express in WinForms.
- Led system deployments, coordinating across teams for smooth implementation.
- Troubleshoot and resolved complex POS system issues across multiple environments.
- Developed and maintained comprehensive system documentation, including user guides and technical specs.
- Conducted small-scale quality assurance (QA) testing to identify and report bugs or inconsistencies within the system.

Key Projects / Systems Developed

- **POS in C# winforms**
- **POS Servers**
- **POS Database Servers (MSSQL)**

Techverse Technology Network and Data Solution

**Talisay, Cebu, Philippines /
Mandaue City Cebu, Philippines**

Network Field Technician (Contractual)

July 2023 - September 2023

- Configuring IPTV, Google Chromecast, tracing Power over Ethernet (PoE) connections, setting up wireless access points (WAP), and network cabling.
- Specializes in setting up, maintaining, and troubleshooting network infrastructures and related equipment.
- Assisting to Network Cloud Engineer on Configuring PABX and SIP systems.

**BlendIT
Student Intern**

**Cebu City, Philippines
February 2023 – June 2023**

- Web Development using DRUPAL Framework Developed web applications using the Drupal framework.
- Worked on WordPress development, utilizing Elementor for building dynamic, customizable pages, and WP Local for local deployment and testing.
- Worked with Lando & Docker for local development environments.
- Utilized PHP for backend development and Git for version control.
- Developed on Windows Subsystem for Linux (WSL) to streamline cross-platform development.
- Managed system administration tasks on Linux servers.
- Used MySQL databases, with phpMyAdmin as the graphical interface for database management.
- Experienced in tweaking zone servers using SSH and FTP, managing the entire server infrastructure.

Key Projects / Systems Developed

- Recreating Sunstar Website using Drupal Framework

Skills & Interests

Technical Skills

NetSuite

- SuiteScript, SuiteFlow, SuiteBuilder
- Saved Searches, Reports, Analytics
- Suitelets, RESTlets
- • Advanced PDF/HTML Templates

Power Platform / SharePoint

- Power Apps, Power Automate
- SharePoint Designer, Microsoft Lists
- Microsoft 365 / Dynamics 365

Full Stack Development

- .NET / ASP.NET MVC / C#
- Next.js, MySQL, MSSQL
- SQL Server

Web Technologies

- HTML, CSS, JavaScript, Bootstrap
- Drupal, WordPress

Database

- MSSQL, MySQL

Version Control

- GitHub, Bitbucket, TFS

Cloud & Systems

- AWS EC2 Deployment
- Linux Environment

Others

- DevExpress (WinForms)
- POS System Support & Troubleshooting

Soft Skills

- Communication
- Critical Thinking
- Problem Solving
- Adaptability
- Reliability

Interests

- Playing Musical Instruments (Guitar, Bass, Piano)

Education

CEBU TECHNOLOGICAL UNIVERSITY
Bachelor of Science in Information Technology
Capstone: Ecosave

M.J. Cuenco Avenue corner R. Palma St., Cebu City
2019-2023

**MANDAUE CITY COMPREHENSIVE
NATIONAL HIGH SCHOOL**
Technical Vocational Livelihood – Information and
Communication / Technology (TVL - ICT)
Graduated with High Honors

Plaridel St. Reclamation Area, Mandaue City
2017 - 2019
