WORK EXPERIENCE

Global AutoDistribution Inc. **Mandaue City, Cebu, Philippines**

NetSuite Developer **February 2025 – Present**

- Handles NetSuite administration, SuiteFlow, SuiteBuilder, and overall system configuration.
- Builds and customizes NetSuite reports (Report Builder, Analytics).
- Develops online/custom forms, templates, SuiteScripts, ClientScripts, and Suitelets.
- Provides reporting solutions and user workflow enhancements.

Key Projects / Systems Developed

NetSuite Development & Automation

- Developed Saved Searches, reports, and analytics dashboards.
- Created custom records with workflows (Cash Advance, Fuel Request, Inventory Accuracy, Parts Cannibalization).
- Implemented SuiteScript validations for bin capacity and item receipt processes.
- Built custom HTML/PDF templates for picking and packing lists.
- Developed Suitelets for printing estimates and opportunities.

NetSuite Integrations & APIs

- Developed NetSuite TBA (Token-Based Authentication) OAuth 1.0 and OAuth 2.0 integrations for external system sync.
- Built RESTlet and SuiteQL-based data pipelines connecting NetSuite to third-party platforms.
- Worked with the Celigo integration platform for automating data flow between NetSuite and other business systems.
- Integrated NetSuite with Power BI via REST API for advanced reporting and analytics.

SharePoint Developer

- Works with SharePoint Designer, Microsoft Power Apps with Power Automate, and M365 tools to automate workflows and improve internal processes.
- Supports Microsoft Dynamics 365 and Office 365 administration.
- Designs and maintains SharePoint sites, libraries, and business process flows.

Key Projects / Systems Developed

Power Apps & Workflow Automation

- Built systems (Cash Advance, Liquidation, Fuel Request, Leave Application).
- Automated approval workflows using Power Automate; used Microsoft Lists as backend database.

Full Stack Developer

- Builds applications using .NET Framework, ASP.NET/MVC, C#, and SQL Server.
- Develops full-stack features using Next.js, TypeScript, MySQL, and PostgreSQL.
- Manages AWS EC2, Azure, and Linux VM deployments and performs database administration.

Key Projects / Systems Developed

Dealer Parts Inquiry System (Next.js, PostgreSQL) · parts.jmc.com.ph

- Rebuilt a Google Apps Script tool into a role-based dealer portal (11 roles) with real-time NetSuite parts availability per branch (RESTlet, OAuth 1.0a).
- Enforced pricing and stock visibility on the server (Dealer Price & SRP, masked quantities); added parts and vehicle ordering, branch reorder-point tracking, and reports on dealer inquiry activity.

Retail Sales & Inventory Tracking System (Next.js, PostgreSQL, NetSuite) · sales.jmc.com.ph

- Built a role-based platform with 5 access tiers for sales monitoring and reporting.
- Implemented NetSuite TBA OAuth 1.0 sync with a Preview → Confirm data flow, replacing a manual saved search + email workflow.

- Designed weekly target breakdown logic matching existing Excel-based models; full CRUD for lookup tables and audit logs.
- Built dashboards (Top Sales Consultants, Dealer vs Target, Model Tracking) with date filtering and dynamic reporting.
- Added a dealer Leads management module with filtering and export, and automated NetSuite VSI sync for "not yet claimed" units.
- Developed VSI/VDR file upload with image optimization; exported Excel reports contain clickable document links.

Parts Receiving System – Web Dashboard (Next.js, PostgreSQL, Prisma) · parts-receiving.jmc.com.ph

- Syncs Purchase Orders and Parts Inventory from NetSuite via RESTlets, with CSV fallback.
- Manages item receiving sessions with real-time scan tracking from the mobile app; exports NetSuite-ready Item Receipt CSV.
- Includes PO/parts lookup, user management, and a receiving statistics dashboard.

Bank Payment Text File Generator (Next.js 16, Prisma 7, NetSuite RESTlet, OAuth 2.0)

- Migrated a Google Apps Script workflow into a full-stack app that exports NetSuite check payments as bank-ready H2H text files.
- Verified the generator byte-for-byte against the bank's own converter output with golden-file tests; added check review warnings, role-based access, and audit logging.

Vehicle PDI – Pre-Delivery Inspection System (Next.js 16, PostgreSQL, Prisma 7, ExcelJS)

- Built a 117-item PDI checklist with two-inspector sign-off, photo evidence, body-damage pin diagrams (11 body types), and a fault workflow.
- Imports the vehicle inventory aging report from Excel; exports PDI reports to Excel/PDF. Deployed on a shared Linux VM with Apache and PM2.

GAI FB Bot – AI Messenger Assistant (Node.js, TypeScript, Claude API, Meta webhooks)

- Built a Messenger assistant for dealer Pages that answers customers in English, Tagalog, or Bisaya using the Claude API.
- Classifies Leads vs. Prospects, hands off to staff when unsure, and creates qualified leads directly in the Retail Sales Leads module; includes off-topic guard and cost limits.

Office Supplies Requisition System (Next.js, TypeScript, PostgreSQL, Prisma, NextAuth)

- Built an internal requisition, inventory, and purchasing system with role and permission management.
- Developed department, item category, unit, and stock location modules and an admin dashboard with audit logging using Server Actions.

Mobile Developer

- Develops cross-platform Flutter (Dart) apps for warehouse and field operations, integrated with Next.js backend APIs and NetSuite-sourced data.
- Implements camera-based barcode/QR scanning for fast, accurate inventory transactions.

Key Projects / Systems Developed

Parts Receiving Mobile App (Flutter)

- Built a Flutter companion app for PO item receiving using barcode/QR scanning (mobile_scanner), scanning directly into sessions started on the web dashboard via REST API.
- Added audio scan feedback and persisted settings for the warehouse floor; configured Android and iOS camera permissions and builds.

Business System Analyst

- Gather and analyze business requirements; document them (BRD, FSD, user stories); analyze current systems and identify gaps.
- Create process flows and system diagrams; translate business needs into technical specs; coordinate with developers and stakeholders.
- Support system testing (QA/UAT), validate data, and generate reports; assist in implementation and deployment.
- Monitor system performance, handle issues, and provide user support and training.

Key Projects / Systems Developed

NetSuite User Manual (Operations side)

- Developed role-based NetSuite user manuals to standardize company operations.

- Performed system analysis and requirements gathering; proposed enhancements and optimized workflows to management.

Symon Systems and Allied Services October 2023 – January 2025

Junior Cloud Engineer

- Created and configured AWS EC2 instances, managing them for optimal performance of deployed systems.
- Managed SQL Server instances hosted on AWS EC2 for database solutions.

Junior Software Engineer

- Developed and maintained applications (POS System: POS, POS Printing & PDE Server) using C# and MSSQL; experienced with DevExpress in WinForms.
- Led system deployments, coordinating across teams for smooth implementation.
- Troubleshot and resolved complex POS system issues across multiple environments.
- Developed and maintained system documentation, including user guides and technical specs; conducted small-scale QA testing.

Key Projects / Systems Developed

- POS in C# WinForms · POS Servers · POS Database Servers (MSSQL)

Techverse Technology Network and Data Solution **Talisay / Mandaue City, Cebu** July 2023 – September 2023

Network Field Technician (Contractual)

- Configured IPTV, Google Chromecast, Power over Ethernet (PoE) connections, wireless access points (WAP), and network cabling.
- Set up, maintained, and troubleshot network infrastructure; assisted the Network Cloud Engineer on PABX and SIP systems.

BlendIT **Cebu City, Philippines** February 2023 – June 2023

Student Intern – Web Development

- Developed web applications with the Drupal framework and WordPress (Elementor, WP Local); recreated the Sunstar website in Drupal.
- Worked with Lando, Docker, and Windows Subsystem for Linux (WSL); used PHP, Git, and MySQL with phpMyAdmin.
- Managed Linux server administration tasks, including SSH and FTP server configuration.

FREELANCE & PERSONAL PROJECTS

Desktop & Web Products

- **KaPresenter** – lightweight worship presentation software for Windows (.NET 8, WPF, NAudio): lyrics, Bible, media, music, stage display, PIN-protected phone remote, crash-safe autosave.
- **KaPresenter Website & License Server** (Next.js 16, Prisma 7, PostgreSQL) – per-PC license activation using hashed hardware fingerprints and signed license keys.
- **Marlon & Ferlyn Grace Wedding Website** (Next.js 15, Prisma, PostgreSQL, Vercel) – client invitation site with name-based RSVP, printable invitation card, and admin dashboard with CSV export.
- **Live TV Karaoke** (Next.js 16, Socket.IO, Prisma) – host a party room on a TV and queue songs in real time from guests' phones via QR code.

Mobile Applications (Flutter)

- **P.A.T.R.O.L Cebu – Hazard-Aware Highway Safety App** (Flutter, FastAPI, Neon PostgreSQL, Railway): offline-first research app with KDE hotspot analysis and Poisson risk modeling for hazard-aware routing.
- **FatherHood Philippines Inc. – Member & Officer App** (Flutter, Riverpod, SQLite, Neon PostgreSQL): Android/iOS/Web, offline-first with a custom sync queue and Firebase push notifications.
- **TindaPOS** (Flutter, Drift/SQLite, Supabase): sari-sari store POS with barcode scanning, inventory, sales charts, and cloud sync.
- **JKT Expense Tracker**, **Reminders App** (PayMongo subscription sync), and **HOA Management System** – offline-first Flutter apps with Next.js backends.

Web Applications (Next.js, PostgreSQL, Prisma)

- iTeacherPH School Management System, Teacher Scheduler, Student Grade Portal, JKCM Church Website, FatherHood Philippines Website, QR Code Generator, Roll & Sing (deployed on Vercel).
- Disaster Response & Coordination System, BloodNet Blood Donation Network, MediCore Hospital Management, Playnata Sports Court Booking, AgriMonitor, Jeep Tracker, RoadWatch Road Damage Reporter, Lunas Mental Health Platform, RTA Dashboard, Church Treasury & Fund Management.
- Barangay, SK, Pageant, and ShinyWheels Carwash management systems; Campaign Catalyst promotional campaign platform (Laravel 12, Backpack CRUD, MySQL); PDF ⇄ Word Converter (AWS S3, LibreOffice, Docker).
- Desktop tools: SSH Connection Manager (.NET 8, WinForms, SQLite) and PDF Encryptor (Java Swing, Apache PDFBox).

SKILLS & INTERESTS

NetSuite: SuiteScript, SuiteFlow, SuiteBuilder, Saved Searches, Reports, Analytics, Suitelets, RESTlets, Advanced PDF/HTML Templates, Integrations & APIs (TBA OAuth 1.0, OAuth 2.0, SuiteTalk, REST, SuiteQL), Celigo

Power Platform / SharePoint: Power Apps, Power Automate, SharePoint Designer, Microsoft Lists, Microsoft 365, Dynamics 365

Full Stack: .NET / ASP.NET MVC / C#, WPF, Next.js, React, TypeScript, Node.js, Prisma ORM, Python (FastAPI), PHP (Laravel), Socket.IO, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, Drupal, WordPress

AI Integration: Claude API (Anthropic SDK), AI-assisted chatbots and webhooks (Meta Messenger)

Mobile: Flutter, Dart (Android, iOS, Web), Riverpod, go_router, SQLite / sqflite, Drift ORM, offline-first sync, Firebase Cloud Messaging, barcode & QR scanning

Database: MSSQL, MySQL, PostgreSQL, SQLite, Neon PostgreSQL, Supabase

Cloud & Systems: AWS EC2, Azure, Linux VM (Apache, PM2), Vercel, Railway, Docker

Version Control & Tools: GitHub, GitLab, Bitbucket, TFS, DBeaver, DevExpress (WinForms), Figma

Soft Skills: Communication, Critical Thinking, Problem Solving, Adaptability, Reliability

Interests: Playing musical instruments (Guitar, Bass, Piano)

EDUCATION

Cebu Technological University 2019 – 2023

Bachelor of Science in Information Technology · M.J. Cuenco Avenue corner R. Palma St., Cebu City · Capstone: Ecosave

Mandaue City Comprehensive National High School 2017 – 2019

Technical Vocational Livelihood – Information and Communications Technology (TVL-ICT) · Graduated with High Honors · Plaridel St. Reclamation Area, Mandaue City
